On 23rd August, 2018 the Faculty of Engineering and Technology came into existence under Khaja Bandanawaz University. The FoET campus is extended over 12.6 acres of land excluding 13 acres which are dedicated for playgrounds. Presently, the FoET offers five streams of Under- Graduate Courses, Three Post-Graduate Courses: Computer Science and Engineering, Structural Engineering and Geo informatics and Five Research Centers: Computer Science & Engineering,Civil Engineering,Mechanical Engineering, Applied Physics & Applied Mathematics.

About Computer Science & Engineering Department

Computer Science and Engineering (CSE) is a branch of Engineering that deals with the study of computers and computational systems, including both hardware and software. It involves the Design, Development, and Analysis of Algorithms, Programming Languages, Software Systems, and Computer Hardware.

The Department of Computer Science and Engineering was established in 1987, and since then, it has grown to become one of the most popular Engineering branch. CSE courses typically covers a wide range of topics, including Data Structures, Algorithms, Operating Systems, Programming languages, Computer Architecture, Databases,Software Engineering,Data Science,IOT,AI & ML.

About the Workshop

The two days national level workshop aims to bring together students, academicians, researchers, engineers and industry experts of various disciplines across the country to a common platform for knowledge sharing and technological development in the field of AI and IoT. Participants will learn to interact with different things to the internet and gain a greater understanding of how to exploit advanced technologies and protocols to connect all sorts of things including resource limited one. Artificial Intelligence is all about adding the features of intelligence to the machines and making them smart and intelligent as humans. This workshop helps the participants to learn from experience and design the systems that act intelligently. The workshop also provides hands-on-training .

Artificial Intelligence and the Internet of Things are two such prospects people believe will modernize the world into something that will blow our minds in the next few decades. These two pillars have a gigantic scope in future.
